DETAILED ACTION

1. Claims 1-57 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Applicant's claims contain combinations not found in the prior art. Kroll et al. (U.S. Patent No. 6,567,697), Snell et al. (5,716,382) and Gould et al., J. Thorac Cardiovasc Surg. 1977 Jul; 74(1): 28-36, are cited herein as relevant prior art. Kroll et al. discloses a device, which is used during fibrillation to maintain some cardiac output for a period of time, thus giving a patient enough time to get to the hospital. Snell et al. discloses a programmer that provides a therapy decision support system to optimize a set of parameters that define the operating characteristics of an implantable cardiac stimulating device. Gould et al. discloses a study using His bundle electrograms to determine if a person is a potential candidate for a pacemaker. However, the prior art does not teach a method of delivering a pacing stimulus to a patients' heart using surface electrodes at a surface pacing level; then determining that the patient is not a candidate for implantation of a subcutaneous defibrillation system if the surface pacing level needed to capture the patient's heart is beyond a predetermined level. In view of these shortcomings in the prior art, the examiner deems claims 1-57 to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
